

UX Design Storyboard

Scenario: Use the audio tour of art gallery app for an enjoyable tour without interruptions - Big picture.

Jeremy and Andrew visit the gallery for a date but are frustrated with the interruptions, lack of information and language barriers.

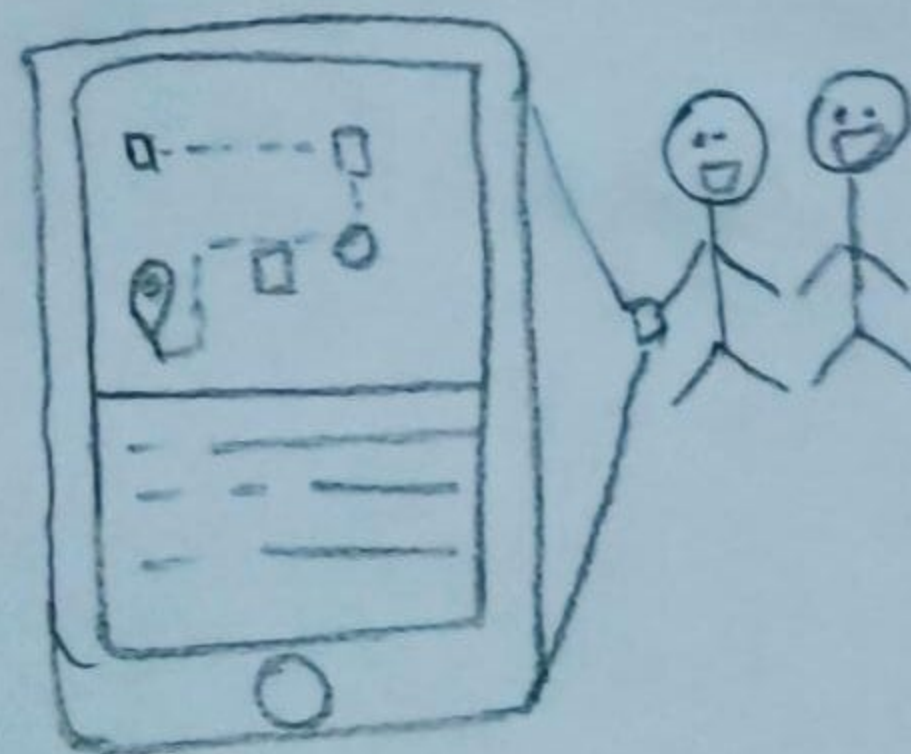

Jeremy installs the art gallery audio tour app and opens it.

The audio with suitable text features allows them to enjoy the gallery at their pace.

Jeremy and Andrew can now connect their apps using Bluetooth and enjoy the tour together.

The map is used by Jeremy to move to their preferred locations in the gallery with useful descriptions.

Jeremy makes the directions online and is happy he got to spend the date well and enjoyed with his boyfriend.
