UX Design Storyboard:
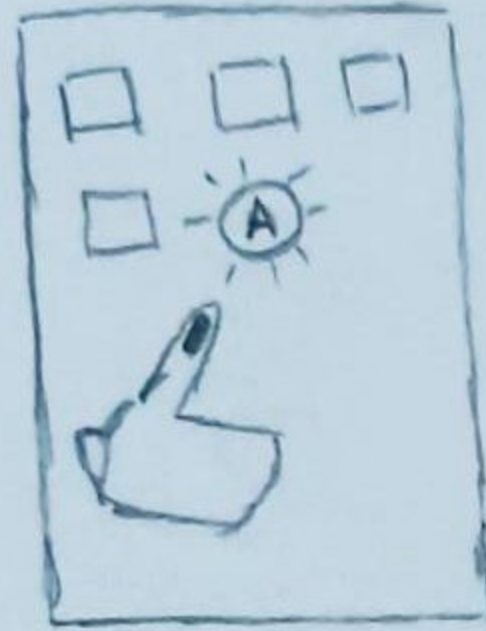

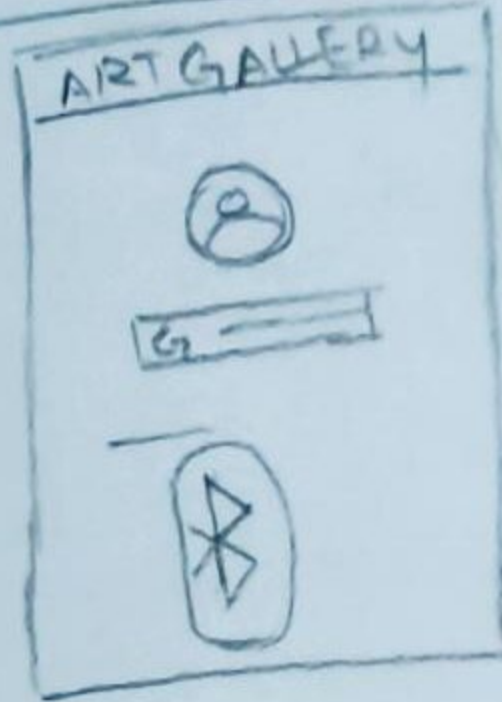

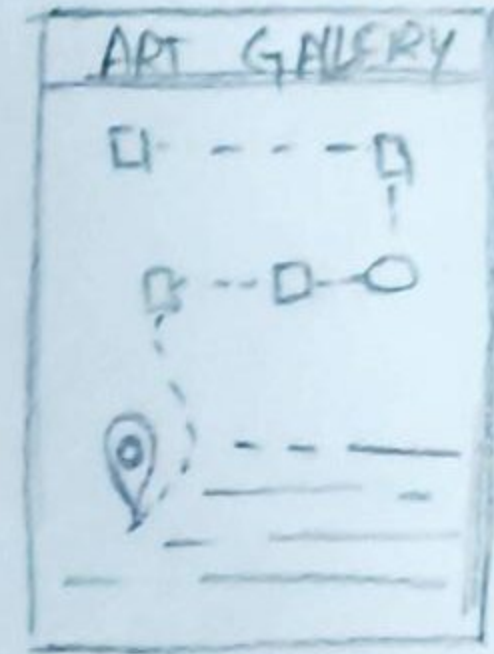

Scenario: Use the audio tour for art gallery app for an enjoyable experience without interruptions — closeup.

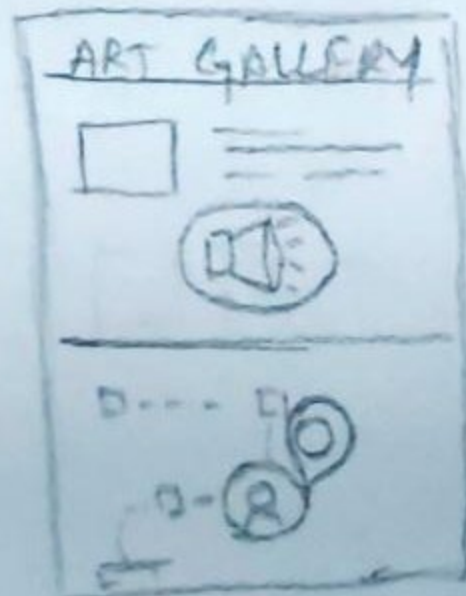

Jeremy installs the app and opens it.

Jeremy signs in and is given the list of events and workshops at the museum with an option of syncing the app with others.

Jeremy is given the option of tour in desired language with audio and description.

Jeremy onboards and are guided by the map through the gallery and optional additional info is given with an option to scan the QR code of the arts

Jeremy ends the tour gives feedback and is given the option of membership for newsletters and event info.

Jeremy successfully makes a donation to the gallery through online payment.
